# venetian blinds

ecowood

Ecowood Venetian is an ideal alternative to natural wood especially where style and function are a must, yet durability and budget constraints are also a consideration. Extremely suitable for wet and humid areas like kitchen and bathroom, our Ecowood Venetians are fade resistant, low maintenance and washable allowing you peace of mind without having to worry about issues like chipping and warping typically encountered with natural wood.

Finishes

White - Smooth	White - Embossed	Natural	Teak
Coffee	Cherrywood

Product Specifications

Product: Ecowood Venetian

Slat: 50 mm wide x 3 mm ± 0.2 mm thick. Furnish not less than nominal 6.9 slats per foot (cloth tape 7.2 slats per foot) to ensure tight closure and light control.

Slat Material: Polystyrene based polymer with consistent color throughout.

Dimensions: Width 500 mm minimum - 2400 mm maximum. Height 500 mm minimum - 2600 mm maximum.

Slat Support: Ladder strings made of 100% polyester yarn compatible with slats and spacing of ladder no more than 44 ± 0.2 mm. Optional ladder tapes constructed of high strength polyester webbing and spacing no more than 44 mm ± 0.2 mm. Ladder tapes spaced to comply with industry standard for size and weight of blind.

Headrail: U-shaped profile with rolled edges measuring 58 mm x 52 mm x 0.4 mm made of corrosion resistant steel delivering a high profile design. Internal components well fit for specified performance and designed for smooth and trouble-free operation. Headrail finish to be standard baked-on polyester and to coordinate with slats. Ends fitted with high-density white plastic end caps.

Bottom Rail: Trapezoid shape 50 mm wide x 15.8 mm ± 0.2 mm made of co-extruded polystyrene-based polymer. Color-coordinated engineered polymer tape buttons to secure the ladder and cord. Finish to be stained or painted to match color of slat.

Lifting Mechanism: Fully enclosed standard cord tilt holds and tilts slats at any angle. Solid steel, corrosion resistant tilt rod. Optional plastic bead chain (Ø4.5 x 6 mm) incorporated into the tilter mechanism designed for bigger and heavy blinds, i.e. blind width exceeds 2000 mm.

Mounting Brackets: Steel square brackets 65 mm x 64 mm x 22 mm with baked-on polyester finish similar to headrail color.

Valance: Canterbury shape polystyrene-based polymer of 63 mm wide x 8 mm thick with finish to coordinate with slats.

Blind Measurement: Shall be accurate with a maximum deviation of no more than ± 3mm or as recommended in writing by epic window fashion.

Deduction Rules: 10 mm off opening width for inside mount. No deductions for outside mount.

Slat Finish: 6 selected colors: White-Smooth, White-Embossed, Natural, Teak, Coffee, Cherrywood, additional colors available by Q3 of 2020.

Ladder Strings: Ladder strings colors to coordinate with slat color. Optional cloth tapes (25 mm x 44 mm x 54 mm) available. Please refer to samples for available tape colors and pricing guide for surcharge.
